

NIST University — Academics & Examination

Academic Structure

B.Tech program follows a semester system with 8 semesters over 4 years.

Each academic year consists of 2 semesters: Odd Semester (July to November) and Even Semester (December to April).

Each semester has approximately 90 working days of instruction.

Examination Pattern

Each subject is evaluated for 100 marks total.

Internal Assessment (IA): 30 marks — includes mid-semester tests, assignments, lab performance, and attendance.

End Semester Examination (ESE): 70 marks — conducted by BPUT at the end of each semester.

Pass mark: Minimum 40 out of 100 (combined internal + external).

Minimum pass mark in End Semester Exam: 28 out of 70.

Grading System

NIST follows the CGPA (Cumulative Grade Point Average) system as per BPUT norms.

Grade O (Outstanding): 90-100 marks — 10 grade points.

Grade E (Excellent): 80-89 marks — 9 grade points.

Grade A (Very Good): 70-79 marks — 8 grade points.

Grade B (Good): 60-69 marks — 7 grade points.

Grade C (Average): 50-59 marks — 6 grade points.

Grade D (Pass): 40-49 marks — 5 grade points.

Grade F (Fail): Below 40 marks — 0 grade points.

Attendance Rules

Minimum attendance requirement: 75% in each subject per semester.

Students with attendance below 75% are not allowed to appear in the End Semester Examination.

Medical leave is considered with proper documentation but attendance must still meet the minimum threshold.

Condonation of attendance shortage may be granted in exceptional cases by the Principal.

Backlog & Arrear Rules

Students who fail in a subject (below 40 marks) are considered to have a backlog/arrear in that subject.

Backlog subjects can be cleared in subsequent semester examinations.

Students must clear all backlogs to be eligible for the final semester examination and degree.

A student cannot have more than a specified number of backlogs to be promoted to the next year.

Project & Internship

7th and 8th semester include a major project (final year project) as a compulsory component.

Students are encouraged to do internships during summer breaks after 2nd and 3rd year.

Mini projects are assigned in 5th and 6th semester as part of the curriculum.
